

# CGMS High Level Priority Plan (HLPP) 2026-2030

## Overview

- All WGs have reviewed the status of implementation of the high-level priorities at the WG meetings in April
  - The Working Groups confirm that the HLPP remain valid and give good high-level guidance to their work. Most HLPP areas are covered well by ongoing actions and gaps will be followed up in inter-sessional activities
  - A number of revisions of the HLPP were proposed during the WG meetings,
- Status of implementation of HLPP targets
  - Provided to plenary in CGMS-54-CGMS-WP-26p
- Proposed revision of the HLPP
  - Provided to plenary in CGMS-54-CGMS-WP27p

## Decision proposed to CGMS-54 plenary

- The Plenary is invited to
  - Consider whether the way forward for AI/ML should be reflected in the HLPP. Current target is:
    - 4.9 Identify AI/ML technologies for applying to the product processing and data management infrastructure and develop best practices
  - Note that JWGClimat has proposed amendments to the HLPP, in particular to reflect the endorsement of the key GHG system requirements
  - Endorse the proposal for a revised HLPP covering the period 2026-2030
    - CGMS members to provide final comments on the HLPP by 19 June, which will be reflected in the document before publication

Thank you for your attention!
